ENVIRONMENTS

# FLOOR LEARNING

# FLOOR LEARNING

Flexible seating in a classroom is important in today's society as it allows each student to learn in an environment that is suited to them. Many students, especially younger ones, enjoy working on the floor or lower to the ground. While it may seem disorderly at a quick glance, they are likely learning best in that environment.

Whether a student is quietly doing a task, collaborating with their peers or participating in a class discussion, the floor could be their ideal surrounding.

Allowing learners to find their best spot can help them to stay calm, attentive, and productive.

# FLOOR LEARNING

Sitting low to the ground is sometimes what some learners, especially the younger ages, need. Furthermore, some tasks are suited to a lower table making a comfortable and effective learning environment. This is the perfect combination for the floor rocker as learners can sit low with a lower workstation.

Floor Rockers offer a subtle back and forth motion, providing an ergonomic alternative for floor seating. They are sturdy and safe with the base covered with a non-marring black foam padded cushion to protect fingers. This also offers the option of deep pressure therapy for those that need it.

## Floor Table with Floor Rockers

# FLOOR LEARNING

## Traditional Teaching Tables

The Medicine Wheel is a circle divided into four colored sections, each color representing a different aspect of life. This four person table is a great way to bring the valuable teachings into a space and may provoke an important conversation.

The floor cushions complement the floor traditional teaching table well. They provide comfort for the student when they are sitting low to the ground. They are also lightweight and small making them easy to transport and store.
