

MOSS for Healthcare Environments

Humans thrive in a biophilic environment- one with visible connections to nature's colors, movement, scents, sounds, and textures. Studies also show that spaces with large windows, indoor plants, and thoughtfully-placed natural analogs make occupants feel calm and better able to focus.

Healthier Environments

Moss helps reconnect humans to the tranquility of nature. Quiet Earth Moss is proven to attenuate noise, reducing stress within the environment and enabling concentration.

No Weekly Maintenance

Quiet Earth Preserved Moss Walls require no watering or natural light, maintaining their beautiful natural textures for many years.

All Natural & Eco-Friendly

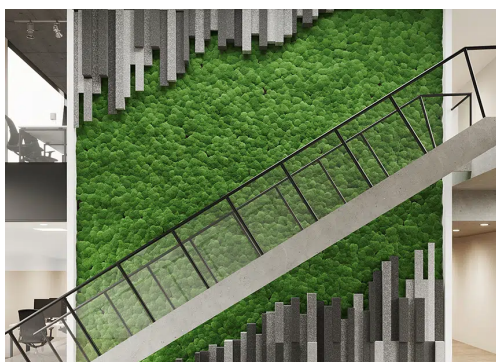

These walls are made with 100% natural moss and preserved with sustainable, environmentally friendly natural oils and food dye.
