

Red River Mutual

Location: Winnipeg, MB

Accent Environments had the exciting opportunity to provide the furniture for Red River Mutual's new location. Working closely with the Red River Mutual team, Accent was involved in designing the space, coordinating the delivery and installing the furniture. Accent provided detailed drawings and personalized project management throughout the entire office fit-out.

— Typical Workstation

The Process

DESIGN

Understanding the vision of the client is a crucial part of the process. To start, Accent coordinated a time to meet with Red River Mutual to showcase different designs and clearly understand what their desire was for the space.

PLAN

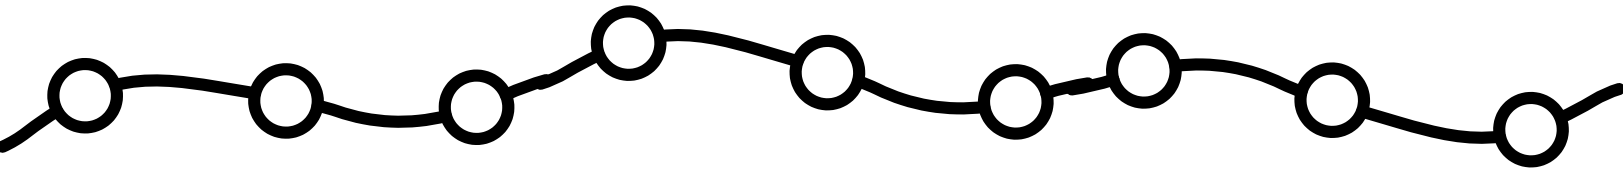

Accent visited the site to fully understand the layout and then worked with their team to create detailed floor layouts and provide design suggestions. Accent planned each room and put its fullest attention into each space to ensure the layout was attractive and practical.

INSTALL

Once the layout, colours, and design were finalized, Accent worked to deliver and install the furniture throughout the entire building.

COMPLETE

Accent Environments stands behind their quality products and does not call a job complete until the client is 100% satisfied.

CASE STUDY

Typical Workstations —

— Reception

Beautiful product and excellent staff. Furnishing a new building is not without its bumps, but it is how efficiently the response was that impressed me.
